A new solution for Smart Class

Keeping pace with the changing times: Modern class room equipments.

For Smart Class Room System, these are the following teaching aids available to make teaching more interactive and enjoyable .

Interactive White Board

The main advantages of the white Board are:

With the **touch of a Digital pen** the teacher can access vast amount of information from computer and the Digital Pen becomes the mouse .

They **can write with digital ink** on the interactive board and save their notes to a single file for easy distribution.

Ease of use and real value for money.

Achieve 100% student attention and enhance their participation and involvement.

Bring **abstract and difficult curriculum concept** to life.

Shift instruction from **presentation to attention.**

Make learning an enjoyable experience for student.

Enhance classroom experience for special learning student.

Audience Response System

Supports self-paced-response so the student handsets can be used to administer paper-based tests and check in homework.

The software provides great flexibility and options in asking different types of questions and answers.

The options are:

Text question mode ● For/Against/Abstain voting mode ● True/False question mode ● Yes/No question mode ● Multiple choice question mode ● Sort – in – order question mode ● Digital question mode (special and convenient fraction input) ● Questions with certain number of options ● Category question mode.

Special Its Mesh audience-checking program displays pictures of the each student to help teachers remember student names, and reduces the risk of cheating in large classrooms.

Visualizer

To demonstrate small object /images or slides kept on the surface.

Upto 48 x Zoom using optical and digital Zoom.

Get student attention and interest on the projected board.

Projector

Used in combination with Interactive Board to project data / presentation.

Multimedia Presentations - Projectors with liquid crystal displays (LCDs) can be hooked up to computers to produce colorful multimedia presentations.

Classroom Uses - Anything available on an individual computer can be projected onto a large classroom screen or wall. Internet sites, Power Point projects, music videos, science lab instructions and math tutorials come to life at the press of a button.

Multiple Approaches - Using LCD projectors allows educators to reach students with multiple approaches. Students enjoy seeing, hearing and interacting with technology rather than simply reading a textbook or listening to a lecture.

Interactive Pad

Interact and annotate over your current topics, PowerPoint slides, Web pages or any other computer application – from anywhere in the room.

Keep participants focused on your topic at the front of the room - even have them come up to the Interactive Pad to solve problems interactively.

Save, Print and Email all your topics, notes and files - A great tool for presentation review, participants who are absent or seniors who wish to review what their colleagues are learning. Participate in the session where you can join with fellow staff to share topics and activities, learn new ideas on how to use your Interactive Board, download new images and background templates.

Digital Lectum

Inter Core 2 Duo PC used to connect Projector and interactive board.

17" Touch Panel LCD for smooth presentation and explanation to student from the podium.

Choose Mike for Voice lecture.

Wireless Keyboard & Mouse.

Audio System

70 watt Audio amplifier for lecture audible to entire class (till last row).

4 nos. of wall mount speaker for classroom so that it is audible from all corners.

One no Cordless Collar Mike and one no normal cordless mike for interaction with teacher and student.

On Line Two way IP camera

To record audio visual proceeding of the classroom so that disturbing elements can be monitored and recorded.

A Teacher can take the class remotely and can make audio interactive discussion remotely.
